

your power for health

Kremsmünster, February 2020

GENERAL INFORMATION:

Coronavirus - availability of our products

Dear Sir / Madam,

With regard to the current situation in China, we would like to reassure you that thanks to our production plants in Europe, the **supply of the European markets with our products is guaranteed** in every respect.

Since most of the raw materials and components required for the manufacturing processes come from European suppliers, only a few components and goods are purchased from China. For all these materials, we have **sufficient stocks** or, if necessary, can also obtain them from alternative European suppliers at any time.

From the current perspective, we do **not expect any effects or restrictions** in the ability to supply our products in connection with the coronavirus. We will continue to monitor the situation critically and inform you immediately if anything changes in this regard.

If you have any further questions, we kindly ask you to contact your respective Area Sales Manager directly.

Best regards
